

250577 Land East and West of Hyde End Road Shinfield

Screening Opinion application for an Environmental Impact Assessment for a proposed residential development consisting of up to 210 dwellings.

Berkshire Archaeology have reviewed this application and, given the archaeological potential of the area, as evidenced by the HER, if it is decided that EIA is required, then we recommend this includes a full assessment of potential archaeological impacts and suggested mitigation measures. This is due to the site's wider area setting, in a landscape with widespread evidence of Prehistoric activity.

We are happy to discuss the details and scope of any archaeological mitigation with the applicant's consultant, should it be required.

Kind regards
Linden
