COMMENTS:

This site is adjacent to our back garden and as we open the backyard which is mainly woodlands is impacted by the flood lights lit entire night. Neither we can sleep in peace nor the natural habitat. Also we have seen the following activities which is disturbing to neighbours.

1. Late night digging and drilling , level and felling of small trees.

2. Overnight pop of camping of static and mobile caravan with several vehicles. Not sure if this is legal but all this was done with flood lights and great noise disturbance.

3. - The sight lines for accessing and exiting range Road. It is incredibly difficult to see what's coming from the right on the NMR and you can't see what's coming up Range Road until you turn onto it, sometimes resulting in cars reversing onto the main road. This is

dangerous for users of the lane and the main roads and more cars on Range Road will make it much more dangerous.

- The sight lines from the houses on Range Road. Drivers cannot see what's coming until they are on the road. More traffic makes it more dangerous.

- No passing places, again resulting in reversing into the main roads.

- There are no safe parking on the road despite that there are cars and lorries blocking the little quiet Range Road.

4. This is nature's dog walking and quiet zone without proper infrastructure for many vehicles and clogging this road is dangerous to nature and humans. There are rabbits, Deers, Foxes badgers and many more species freely wandering are put at risk with more vehicles on this little road.
