Proposed works to a tree covered by a Tree Preservation Order

- T1 Oak: Located within the protected area. This tree is heavily suppressed by the neighbouring Oak, with a completely off-centre crown extending south and west. The crown is in contact with the property causing moss build up.
- Reduce south and western quadrants by 2m and blend in to the remaining crown.
 - This reduces the radial spread from approximately 7m to 5m
 - Lift the crown to a height above ground level of 4m over the driveway by removing secondary and tertiary branches only.
 - This will give adequate clearance over the drive and additional light to the understory planting and house.
 - Remove deadwood >40mm in diameter.

Showing off-centre crown.
