COMMENTS:

This planning application is ridiculous. Lower Earley way is a single lane road flat is unable to cope with the current level of traffic let alone loads more houses. Every morning I queue for 20 mins just to reach the showcase roundabout. Our schools are overwhelmed by the levels of applications and GP surgeries can't meet demands. You say you will build more but this wont happen until further and later into the build causing massive issues prior to this. Lower Earley is too populated already adding more will cause devastation to the families living here already. I for one will leave the area if this goes through as my job will be affected by the increased traffic.
