Good Morning

My apologies. I agreed with the Trees & Landscape Officer on Friday  would respond to confirm we have no objection to the works outlined in the letter from Lizard Ecology and a TPO application being submitted. Sorry I haven't responded sooner.

We must be aware bird nesting can start any time from mid Feb. So if  wants to discuss any measures such reducing down height of shrubs to deter nesting in the agreed areas and a schedule of pre-commencement checks I'm happy to be in contact direct.

The Countryside Service's resources are stretched, and invasive species control has to be focussed on the SSSI and most sensitive areas. But I'm happy to try the Countryside Manager again to see what resources or licence would need to be agreed do off-site works to eradicate rhododendron and control bamboo in the boundary of the Country Park.

I note that we are still awaiting the baseline photos approved in the HMMP and details of what works have been implemented since the HMMP was approved. I'm happy to attend a joint site inspection when landscaping and planting have been laid/implemented .

Many thanks

Ecology Officer – Green Infrastructure Team
