

Community Involvement Statement (CIS)

Earley East Building, Thames Valley Park, Earley, Reading RG6 1PT

This planning application relates to the installation of a simple modular access ramp to facilitate a safe means of escape from a fire exit point to the rear of the ground floor kitchen.

Given the small scale and unobtrusive nature of the work (entirely within the site boundary and with no visual or physical impact on neighbouring or adjacent properties) it was not considered necessary to undertake formal community engagement.

The proposal is unlikely to generate any material planning concerns, and no objections are anticipated as a result.
