COMMENTS:

I would like to feedback a notable issue on highway safety and traffic impact. Hyde End Road is not built for large traffic volumes, with narrow road (lanes) and narrow pathways. This road is appropriate for rural low/reasonable traffic but is now over-stretched and busy due to recent developments.

This road is now increasingly dangerous for pedestrians and will only get worse with this development.

Large vehicles create disturbance (vibrations) and can struggle to pass safely. Noting specifically the area towards School Green where school children and pedestrians walk. I have witnessed lorry wing mirrors exceeding the carriageway and are over the footpath.

Hyde End Road needs to be reviewed and a solution found to divert traffic away, or widen the footpath and make the road slower / safer.
