COMMENTS:

Parking and Road Safety.

As someone that lives very close to the current dental practice I already experience issues with having my driveway blocked and cars parking on the pavement on the layby, by patients attending the dentist. An increase in patients attending the practice will exacerbate this situation (the two additional parking bays in the proposal are not adequate). If this proposal is to go ahead what action will be taken to prevent this from happening. Will the council introduce parking restrictions to stop people parking across dropped curbs in the area and ensure safety on this already very busy section of road.
