COMMENTS:

Having read the proposed planning application to say it's inappropriate is an understatement.

1. The footpaths within the area affected are very narrow and the road width minimal so two passing lorries could be very dangerous.
 2. Both Primary and secondary school age children walk to school along the proposed route. Such large Lorries and their frequency are an added danger. Surely this type of proposal should be on an industrial unit that has wide roads with wide access points as in a out of town, large scale industrial sites of which there must be many, not in a village!
 3. Noise pollution.
 4. pollution of the environment.
 5. Unnecessary due other areas better suited to such a proposal.
 6. There are many times when traffic is backed up from the centre of the village to past the proposed site and if you add more traffic then it is going to be intolerable and cause more pollution.
- Lastly I cannot understand what benefit this proposal will actually bring to the village and object to it in the strongest manner.
