COMMENTS:

Side 1 elevation proposal shows an extension-brick-wall facing our property (9 wilderness road) but currently there is a door opening built in the extension facing our property.

The retrospective proposal isn't an accurate representation of what has been built already and we believe the owner hasn't been transparent about number of openings in the side-1 elevation.

The proposal of 1.8m privacy screens is a significant concern to us. Although it is proposed but current owner has demonstrated no regard to privacy during the build process and we believe the proposed screens will not materialize.
