COMMENTS:

I fully understand the residents want to take out the overgrown shrubbery and add the space to there garden. My comment is replacing the brick wall with a fence is not in keeping with boundary alongside Campion Way or Sorrel Close which is mostly of brick. Hopefully its possible to reuse the bricks from the existing wall to create wall boundary not a wooden fence. This will give the occupiers of number 18 the additional space removing the shrubbery. Putting a brick wall in place like the others will keep it line with other boundaries along Campion Way on that side of the road. It will be more aesthetically pleasing and will last far longer. There is an additional challenge where a telephone control box is in place. How will that be managed and will any of the neighbours will loose board connectivity during the excavation of the for either a fence or preferably a brick wall.
