COMMENTS:

More houses will mean more traffic on the roads ,which already have terrible congestion problems. Hospitals and doctors are all under pressure. Where will people go if they need treatment from a doctor or dentist. Flood plains are an issue as many homes and hotel have already been built on them and cause ongoing flooding. lot of new built homes and flats have been built to a very low standard .Poor quality Flats with poor soundproofing between floors, and large cracks in walls appearing after only a few years. . Levels of pollution from cars also an issue as many households have more than one car or van . This PROPOSAL FOR MORE HOMES SHOULD NOT GO AHEAD .
