COMMENTS:

Do we really have to have more light pollution, energy wasted and ugly street furniture littering our borough? Why the need for flagpoles, totems, digital screens etc. on an already busy roundabout, which is going to end up looking like Piccadilly Circus? More cars visiting the Six Sixty means more traffic clogging up the roads there. The climate and nature crisis is here, yet we continue as if it's business as usual. I object to the constant commercialisation of our neighbourhoods like this. Does Six Sixty know about the Loddon flooding, which no doubt will happen even more frequently?
