COMMENTS:

The revised plans for access to the development still propose the use of what is a currently a narrow private road onto Old Forest Road. Access could instead be gamed to the site from the new bypass. Old Forest Road is not suitable to take any creased volume of traffic.

This was the reason for the bypass. The proposed junction is, in addition, between two existing junctions and very close to the double road junction for Commons Road and Lowther Road. This makes it unsuitable and dangerous.
