COMMENTS:

I have found it challenging to find suitable housing within Finchampstead that accommodates my budget and needs without having to move out of the area.

I strongly support for the proposed housing development in Finchampstead. This development is crucial for several reasons:

1. Maintaining Community Ties: Staying in Finchampstead would allow me to remain close to my parents and sister, preserving our close-knit family ties. This is important not only for our emotional well-being but also for providing mutual support in times of need.

2. Addressing Age Disparity: Currently, Finchampstead faces a significant age disparity, with very few young couples and children residing in the area. The lack of affordable housing options for first-time buyers like myself forces younger individuals to look elsewhere. This development would provide much-needed housing for younger families, contributing to a more balanced and vibrant community.

3. Community Vitality: Introducing more young families into Finchampstead would invigorate the community, bringing diversity, energy, and new ideas. Young families often engage actively in local schools, sports teams, and community events, enriching the social fabric of the area.

I believe that this development is what Finchampstead needs to ensure its future as a thriving, inclusive, and diverse community. I kindly urge you to consider the long-term benefits of supporting this project, not only for individuals like myself but for the entire community
