COMMENTS:

This latest attempt to develop the land off Tape Lane yet again wrongly supposes that there is any appetite from those living in Hurst or its surrounding areas for such a large development of houses, albeit scaled down somewhat from last time. We neither need or want any of the "planning gain" sweeteners being suggested. A hundred new houses would put significant, unwelcome and unnecessary pressures on the local road infrastructure, sewerage systems, schools and eco habitats. The quiet and peaceful ambience of the village would be irrevocably and negatively changed and the only parties who would gain from such an over-development would be the landowners and their bankers. These persistent and repeat attempts by the developers to wreck this small village by tweaking the figures must stop.
