COMMENTS:

I do not fully object, but some consideration must be made to the windows on the 1st floor of the proposed building. It is clearly an area for staff and their windows will look directly into my 1st floor bedroom, at the exact same height and a mere 17 meters from my building.

They will have a full view into my bedroom and most of my flat at that range.

I will be left with no privacy in the bedroom without having to close my blinds.

I proposed they install frosted glass glazing on these windows and the opening angle of these windows be considered.
