COMMENTS:

I am objecting the plans for these two two storey semi detached house to be built on Fosters lane due to the fact that they are not within keeping of the road that has a mixture of semi detached and detached bungalows all at the same height. The height of these houses will over power the properties either side by at least two metres and block natural sunlight to both and adjacent properties.

The extra traffic from These houses will be horrendous, as stated in the plans the houses will be able to occupy five people each, if everyone has a car that is up to ten cars extra on the street which is unacceptable as parking is hard enough on a busy road that is used as a cut through and adjacent to the junction of Malvern close.

The most sensible think to do would be to put either a new detached bungalow or two semi detached bungalows in its place therefore keeping within the look and height of properties on the rest of the road.
