Supporting information requirements

Where a development proposal is likely to affect features of biodiversity or geological conservation interest, you will need to submit, with the application, sufficient information and assessments to allow the local planning authority to determine the proposal.

Failure to submit all information required will result in your application being deemed invalid. It will not be considered valid until all information required by the local planning authority has been submitted.

Your local planning authority will be able to advise on the content of any assessments that may be required.

Biodiversity net gain

Biodiversity net gain is a legal requirement for planning permission introduced on 12 February 2024. All applications are required to either provide detailed information proving there will be a biodiversity increase; or explain why the requirement does not apply to the development.

Do you believe that, if the development is granted permission, the general Biodiversity Gain Condition (as set out in [Paragraph 13 of Schedule 7A of the Town and Country Planning Act 1990 \(as amended\)](#)) would apply?

☐ Yes

☒ No

Biodiversity net gain has been introduced as a general condition for planning permission. As set out in [The Environment Act 2021](#): "grants of planning permission in England [are] to be subject to a condition to secure that the biodiversity gain objective is met". Therefore, in England, all planning permissions are generally subject to biodiversity gain rules, unless they are specifically exempt or out of scope.

If you have stated that the biodiversity net gain requirement does not apply to your application you must provide the reason(s) why, and may also need to supply evidence (especially where you believe the application is eligible for the 'de minimis' exemption).

Please add all the reasons why biodiversity net gain does not apply and enter a justification for each one

Reason biodiversity net gain does not apply:

Self-build and custom build development

Are you building more than nine houses?:

No

Is the total size over 0.5 hectares?:

No

Do all buildings meet the definition of self-build or custom housebuilding as set out in [section 1\(A1\) of the Self-build and Custom Housebuilding Act 2015](#)?:

Yes

Does your Local Planning Authority require applicants for self-build and custom-build development to evidence their eligibility?:

Yes

Please justify the reason why biodiversity net gain does not apply:

The application is exempt from the general Biodiversity Gain Condition as set out by Regulation 8 of the Biodiversity Gain Requirements (Exemptions) Regulations 2024. I state the following is true: I confirm that the development consists of 9 or less dwellings; I confirm that the total site area of the development is 0.5 ha or less; and I confirm that every building in the development meets the legal definition of "Self-build and Custom Housebuilding" as set out in section 1(A1) of the Self-build and Custom Housebuilding Act 2015. The application thus conforms with the criteria set out in Regulation 8 of the Biodiversity Gain Requirements (Exemptions) Regulations 2024 and is eligible to an exemption from the mandatory biodiversity gain planning condition."

Note: Please read the help text for further information why developments may be exempt or not in scope.

- (b) an elected member
- (c) related to a member of staff

It is an important principle of decision-making that the process is open and transparent.
