COMMENTS:

The reasons below are why I object to this planning application:

The biggest issue for me is the new advertisements are large and directly block my view when reversing in and out of my drive way. My car is right next to them. This is already a dangerous stretch of the road due to the number of cars that park for the shop and bakery and this is making it worse.

They also limit the visibility of cars and lorries turning out of the industrial estate in the same way which compounds the safety issue. This is a high footfall area and includes school kids waiting for busses at the busiest times. This is just adding to a high risk situation.

Along with this, they are continuing to change the village atmosphere by converting what should be a residential village street with a few businesses into a industrial and commercial dominated stretch of road. The industrial estate is spilling out it's boundaries.

The application for this lists it as 'temporary', but the frames are concreted in so while what is displayed may change, once approved they would be able to have advertising all year round. Respect to the planning process and local residents was not considered when these were erected.
