COMMENTS:

As already stated in past objections I have made, I object wholeheartedly to this development and any further planning amendments to it.

The whole structure is an eyesore - a blot on the landscape and totally out of character with the surrounding area and properties.

The height of the structure is totally unacceptable. From the back of my house - downstairs and upstairs - and from my back garden, the care home building is now my one and only view. I used to enjoy my garden, being a keen gardener and enjoying the peaceful nature of the garden. Now my enjoyment is totally ruined by the view (the overbearing building) and the noise from the construction.

The noise levels have been unacceptable, and will undoubtedly continue to be unacceptable, in fact be even worse. Noise throughout the day and night (as well as the lighting) will continue to affect the lives and well-being of residents.

I work from home most days, and I have had to relocate to working at the front of my house, and my concentration has been impacted since the start of the construction of the care home. My health and general well-being has also suffered since the construction was started. I feel like a prisoner in my own home.

I do not want to have to look at this huge and ugly care home building for the rest of my life.

I strongly request that WBC listens to the objections of the residents and considers the impact this has had on our lives, and would continue to have.

I urge WBC to retrospectively reconsider and reject the whole plan; that the care home be built somewhere else where it will not adversely affect the lives of residents, that the land is used as a green space for natural wildlife habitat with no buildings causing noise pollution, and residents do not have to suffer a huge and ugly building as their only view from their houses and gardens. Please listen to and consider our views.
