COMMENTS:

I wish to add a further OBJECTION to that which I have already submitted.

The proposed bollard lighting on the driveway in front of the proposed houses is inappropriate in the context of the unlit Heath Ride byway. It will create an island of illuminated road in the middle of an unlit one. This is out of keeping with the style and nature of the area and increases the "urban" feel of this proposed development. It will create a permanent and significant change to the character of Heath Ride.
