COMMENTS:

I live at 1 Kingfisher Grove and I decline this development due to the destruction of wildlife areas, bridal paths that are enjoyed by animals, families and it is a lovely walk which would be a shame to destroy it as there are not many places left to go on lovely walks which is a great value to mental health as there is an increase in this. Not only mental health we do not have enough services to accommodate this developments. Doctor surgeries, schools and dentists are struggling already with the population we have. Traffic will then also quadruple and it is bad enough around here already with our adding to it, we moved here to live in a village not a town so please keep it as a village. There also is not enough adequate parking for the houses that are built on these estates which means people are then forced to park on these roads resulting in obstruction to other homeowners, traffic and accidents waiting to happen.
