COMMENTS:

I wish to strongly object to the revised planning application for the development of what is still clearly a 3 storey building opposite my own house at 2 Remenham Row. The application suggests that the buildings will be 2.5 storey, but they are clearly 3 stories with full height windows that will directly overlook my house. The height and footprint of the new design has not changed, and so the impact will be exactly the same, and is unacceptable from a privacy perspective. It would also appear that the new building is approximately 20meters from my house, which contravenes regulations that require 30m separation.
