COMMENTS:

My husband and I have reviewed all planning documentation and note that the internal ceiling height is 2.4m with full pitch roof. Please can you provide further details regarding the full building pitch height as the existing construction has a lower/ flatter pitch and was previously obscured by greenery/ trees.

We note that the owner will install boundary fencing with beech hedging.

Please can you provide more detail regarding the fencing?

Site clearance has made the back of our property visible to the lane. We would like to ensure that previous privacy that we had, provided by the overgrowth/ greenery will be restored with new fencing/ hedging.
