COMMENTS:

The proposed erection of 2no. buildings & open log store with parking access plus the formation of an earth bund & acoustic screen around a wood chipper following demolition of existing buildings is inappropriate given the proximity to local housing (Curly's Way housing, Part Lane housing & Church Road housing) & the associated high noise levels, frequent access to transport logs/wood, chipping of said logs/wood. It is also in a designated flood zone & access to Part lane is often constricted during periods of heavy rain when the road is flooded and inaccessible.
