COMMENTS:

I wish to raise the same objections I raised before . this proposal is far too high, too large and on too small a plot. The land in the middle of the plot does not belong to the Council. It will be impossible to build this proposed structure with the limited vehicular access via Park Road - why are you saying the plot is on Station Road and Wellington Road? Why is your plan showing the plot actually touches the walls of the first house in Park Road ? There is inadequate parking for so many flats and not enough amenity space. You state that evacuation lifts have been put in. What are these supposed to be? Lifts cannot be used if there is a fire! I support the provision of the type of housing proposed by WBC but this plan needs to be substantially altered to fit the available plot.
