COMMENTS:

As already stated within planning permission number 241926, I object to any planning applications for this development. I am a resident living nearby to this development and I can hear and feel HGV vehicles travelling along Viscount Way to the existing businesses. I now have the pleasure of listening to building works which has increased noise and air pollution. Work has already commenced prior to receiving approval which surely should not be the case. Also there is still no indication on working hours which clearly need to be communicated so that residents have the right to object.
