

Sainsbury's Store Arborfield

Car Parking Management Plan - April 2025

1.1 The car park will operate as a short stay car park which will be controlled by Automatic

Number Plate Recognition (ANPR) with a maximum parking time limit of 3 hours. The 3 hour maximum stay limit will be enforced during store opening hours.

1.2 Outside store opening hours, the maximum duration of stay will be reduced to 10 minutes to reduce the likelihood of anti-social behaviour. Colleagues requiring parking during night shifts will be exempt from this restriction.

1.3 Static signage will be displayed within the car park which will clearly display details of the method of enforcement, duration of stay and penalties in operation.

1.4 The ANPR cameras will register the time vehicles arrive and depart and for vehicles staying for longer than the maximum permitted duration of stay, a fixed penalty notice will be automatically generated and issued. A parking charge will be enforced by obtaining the name and address of the vehicle keeper through the Driver and Vehicle Licensing Agency (DVLA) system to which the car park operator (Euro Car Parks) will be linked.

1.5 Enforcement will be at the discretion of Sainsbury's Supermarkets Limited or their management company but will be consistent with the overall objective of discouraging long term car parking.

1.6 Additional patrols will be undertaken to ensure compliance with Disabled, parent and child spaces and electric charging spaces.

1.7 Signs will be erected within the car park setting out the terms and conditions of its use. These will be as follows:

- The car park will be for use for all with parking limited to a three hour maximum stay;
- Only Blue Badge holders will be permitted to park in the disabled parking spaces;

- Parking will only be permitted within the marked parking spaces;
- No return within two hours.

1.8 All users of the car park will be expected to adhere to the terms and conditions on admittance and the car park will be managed by or on behalf of Sainsbury's Supermarkets Limited to ensure such adherence.

1.9 The car park management system will become operational at store opening and be subject to an initial review and thereafter on an annual basis.

1.10 Should it subsequently become apparent that the management objectives are not being successfully met then an interim review will be undertaken. All reviews will consider alternative car park management including the level of penalties and maximum duration of stay in operation and the introduction of charging.

1.11 All new Sainsbury's new supermarket car parks are designed to meet or exceed the Park Mark Award Scheme. This includes CCTV and appropriate levels of lighting conforming to BS 5489 Part 9. The store offers natural surveillance of the car park with colleagues in store throughout the evening and early morning.
