COMMENTS:

As a resident of Cockpole Green for over 30 years, it is vital that such an historic asset is preserved for the community. The only way this will be achieved is if the building is being used for the purposes it was built. The Horns appears as a public house on the Tithe Maps of the 1700's and has remained a pub since then. It feels, not only right to protect this history for future generations but a public duty. The plans appear to be very sympathetic to and in keeping with the historical design, structure and layout of the building. I fully support this application and trust that approval will be granted without delay.
