COMMENTS:

This is let another project to place housing in a green area. The area is already being targeted with additional housing ruining the environment. Currently areas feeding into this are under increasing stress to support existing habitation. Look at the supply of water and removal of sewage. The infrastructure is breaking at the seams. Traffic is another area of concern, especially being so close to educational facilities for young children.

All in all this project should not go ahead. There are other projects in the pipeline that will provide adequate housing for those that need it.
