Comments On Proposal

Discharge of Condition

I refer to the above planning application, which LLFA conditioned due to insufficient detail provided in Surface water Drainage strategy.

Following further correspondence with the applicant and their subsequent submission of surface water drainage details along with drawing no. 200 revision P05 which shows location of (SuDS) and also applicant provided Micro drainage Calculations it is now confirmed that the revised proposal meets the requirements of application for which LLFA is statutory consultee. All SuDS features to be maintained according to the manufacturer's recommendations. It is responsibility of the applicant to inform LLFA if there is any change in surface water design at construction stage.

It is recommended that condition no. 5 related to surface water drainage may now be discharged.
