COMMENTS:

I would welcome new boundary fencing which would provide increased privacy (to both ourselves and the school) and some noise reduction. However, I have in recent years planted trees and shrubs along our side of the boundary fence to provide us with a privacy/sound barrier and understand that the same is true with some of our neighbours. We would like an assurance that no damage will be caused to our plants and that should that happen they would be replaced with trees/shrubs of the same size and maturity

.
