COMMENTS:

1. Rear dormer- this will look down the full length of our garden and into the family room which is an unacceptable reduction in our privacy. The dormer is not in keeping with immediate houses rooflines all of which have velux windows. We request that the dormer is removed from the plan .
2. Rear single storey extension. A full width extension and at 6 metres depth is oppressively large. We request that the extension is at 1 metre from the joint border.
3. Request roof pitch of single storey extension be at lowest level to minimise blocking of light.
