COMMENTS:

COMMENTS: As a member of the fishing syndicate I have numerous concerns regarding this application.

Flooding, which has noticeably got worse in recent years.

Inherent instability of the site.

Risk of pollution due to spillage.

Planned Piping of outflow of waste water into Loddon and risk of fish and wildlife death.

The risk of 50plus tanker movements per day onto Old Bath Road swinging across both carriageways to exit site between two blind bends where excess speed is the norm.

Noise, light and air quality pollution. They are planning on

operating 7 days a week incl bh from 6am.

The Smell of fuel and light pollution
