COMMENTS:

I believe the demolition has started already as we have heard a lot of construction noises and loud crashes coming from the site for a few months now. We in the Road I live in have only just been made aware of the fate of the old Shire Hall building which should not be demolished, it should be redeveloped as it is an iconic landmark not only in Shinfield, Wokingham and Reading but the whole of Berkshire. I believe that we should have been notified sooner, not once the works have already commenced to a point where putting it back to as it was before the works started is next to impossible let alone uneconomical. I believe that the decision has already been made so there is nothing more we can do.

The traffic this development will produce on already crowded roads will make getting out of the Whitley Wood Lane junction significantly harder. Also the noise from vehicles moving around the finished site will be a constant issue as it isn't very far from my property meaning the streets around (which there are plenty) will have to deal with 24hrs of coming and goings of large noisy dirty vehicles
