COMMENTS:

Thank you for the planning application leaflets dropped for the houses.

I wouldn't ask you if it was not the matter of health and safety for the kids who spend some afternoon/evening time playing here in this small park.

I sent an email to Cala Homes, Realty Management and Wokingham Council about the concern of this uncut wild weed jungle type portion just at front of the houses. I have attached the pictures of area about a month ago which was left uncut while other small portions of the grass around was taken down.

Dozens of kids spend playing hours here everyday. My kids too came with bruises , scratches and spots due to some allergic wild bushes here. It is the matter taken care of seriously.

This is only open fitness ground in Finchwood Park. The front houses of Harvest Path and Pasture close (Finchwood park, Wokingham) are getting issues with dangerous flies, insects, large spiders and mosquitoes coming across the windows. This is too hot and we can not leave the windows shut down. I spoke to many parents here whose kids have got health issues due to this fastly growing insects and flies.

I hope I have made you the picture clear about the situation we are facing as a locality. Can you please take care of this further from here.

Kindly help this issue ASAP so the kids can spend good quality time at this place without any concern or fear. It is the matter of health and safety for the residents. I can send you more pictures if you ask me. I can not see if I can attach here supporting the evidence.

Kindly help and resolve this concern.

Thank you.
