COMMENTS:

I strong object to more destruction of green spaces, wildlife and ancient trees in this borough, have we not had enough? There is no need for this development to go ahead with what is already proposed by WBC, there are no school or drs places and traffic is horrendous with very poor public transport provision. Planting new trees does not mitigate taking away existing old trees and hedgerows that take years to establish. WBC putting Hall Farm to sacrifice is supposed to stop the already overdeveloped area gaining more houses, will this actually be the case?
