COMMENTS:

The infrastructure of the entire area suggested for building does not support further development for many reasons. Meadowland and flooding issues with ditches are unsafe and potential of high water levels

which the Council already struggle in dealing with would be ill advised to build on. More housing would create more people and more traffic - the area already has no facilities to sustain more people - already places have closed ie petrol station and 2 post offices. The local school potentially could not take more children and thus more transport would be needed to ship children out to other areas thus increasing traffic and safety issues on such a narrow Longwater Road with restrictions on traffic speed where the council have always refused to put speeding cameras and it rarely is supervised for speeding traffic. Noise levels of traffic would increase and the danger for children in total whereby the pavements already do not exist on either side of the road. Council have already acknowledged that 4 people need to die before they install speeding cameras!!!! Does the Council want deaths on their hands with already inadequate health and safety issues. There currently is a lack of public transport which would have to be increased and the road size wouldn't be able to cope. It's such a pity that a countryside area is under such consideration for building when it involves green land being sold for the sake of greed and money making projects. Consideration needs to be taken into account for the increase of wildlife already in this area that house building would eliminate. Nothing here would suggest that on any account is building a requirement or indeed a good idea. Some common sense needs to prevail in this potential planning request which is totally out of order on all accounts provided above.
