COMMENTS:

I support this development, making use of nearby sites to Winnersh. It looks like a very good mix for cars, active travel, and public transport. It would be nice to see the 500 service extended to Sunday as this would likely be the fastest route into Reading for the development, and would be a boon to current residents especially when the railway is closed for maintenance.

The density looks nice as well, and the new public areas on the site will be a big improvement for the area and provide a nice destination for current residents in the area.
