Landscaping Impact Assessment Statement

Proposal: The proposal is for the installation of a single pop-up padel court (a Jubo Super Panoramic design as shown on page 2) on one of the existing eight tennis courts at Wargrave Tennis Club (see site map and interactive model).

Landscaping Impact:

The visual impact of the court will be minimal due to the predominantly glass structure of the padel court. The court we are proposing is designed to achieve the minimum visual impact, with no pillars in the corners, to offer maximum performance to both players and spectators.

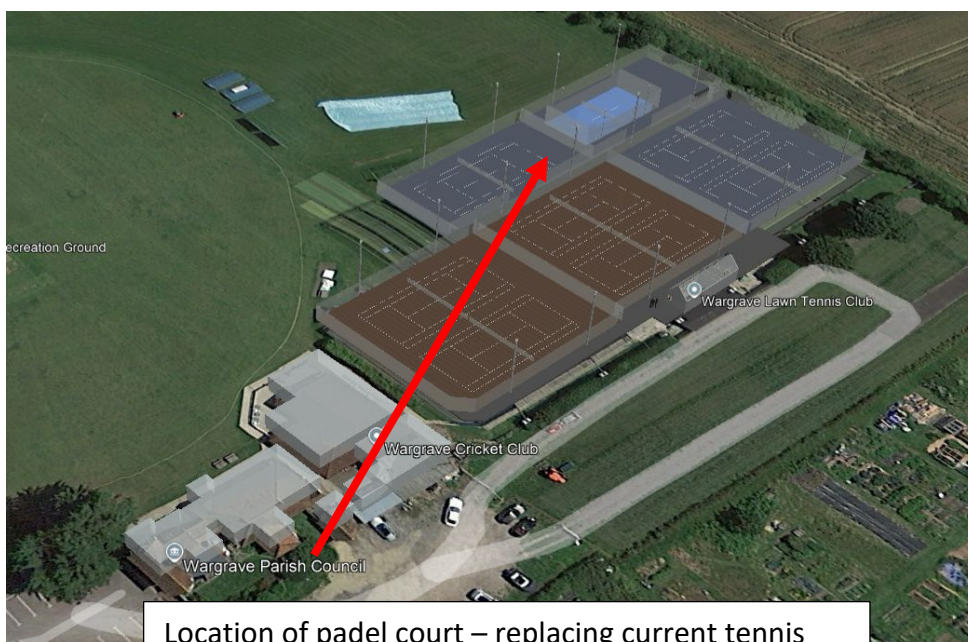

The court will sit within the boundary of an existing tennis court (with existing green chain mesh fence) and will have little or no impact on the landscape.

We are also proposing that the framework that will be painted green to match the green of the existing chain fence that surrounds the current tennis court.

The proposed pop-up padel court is a temporary structure that does not require foundations or any fixtures that would damage the tarmac surface of the existing tennis court. This will minimize any environmental impact and preserve the aesthetic integrity of our facilities, e.g. we can easily remove the padel court structure at a later date.

The design ensures compatibility with the club's existing infrastructure while maximising usage and accessibility for all members of the community.

Landscaping Model of Proposed Pop-Up Panoramic Padel Court - An interactive model of the proposal and plans are available at <https://go.wargravetennis.com/planningmodel>.

Location of padel court – replacing current tennis
