

WBC Planning Application 243126

Good morning

I too have reviewed this application and would confirm that similar to the previous application (240307) and based on the information provided that we would not advise against the application.

I have reviewed the Emergency Plans however and believe there are some small improvements which should be made to ensure as far as possible those working or visiting the site are protected as much as possible should a radiation emergency arise and to limit any additional impact on the emergency responders. I have liaised with Mr Williamson in relation to this.

Therefore, on that basis I would suggest the conditions are included should the application be approved unless resolved in advance. regardless however a condition should be attached in relation to maintaining a valid emergency plan and to be provided to the LPA within one month should the LPA request it.

Should you have any queries regarding the above please let me know.

Regards

Carolyn
