COMMENTS:

I am strongly opposed to the fuel depot due to many issues already raised by others, but in particular the safety risk posed to cyclists on the Old Bath Rd. As a regular cyclist on this stretch of road, I often feel at risk when overtaken by HGVs due to the bends and narrowness of the road. Currently, the volume of HGVs seems relatively low given the A4 being the obvious route for through traffic, but clearly this would change with the opening of the planned depot, and I feel would pose considerable additional risk to cyclists and other road users.
