COMMENTS:

I wish to highlight the importance of preserving the rights of way, footpaths, trees and biodiversity in the area to the west of the site (covered in pp 26-33 of the Landscape and Visual impact Assessment by Pegasus). It is reassuring that this area is not subject to direct redevelopment, but I am concerned that the biodiversity and trees there are not adequately recorded by the Initial Landscape Plan, and there is little evidence in the planning documents that this area, the rights of way and these trees (while not directly subject to redevelopment) will be adequately protected during the development work. I'd be grateful if this can be considered during the planning stages, and this entirety of this area be excluded from development work and traffic.
