Types of Tree Preservation Order (TPO)

- **Single** - If trees merit protection in their own right, they can be specified as individual trees in the Order.
- **Group** - The group category is used to protect groups of trees where the individual category would not be appropriate and the group's overall impact and quality merits protection.
- **Area** - The area category is one way of protecting individual trees dispersed over an area. It can protect all trees within an area defined on the Order's map or only those species which it is expedient to protect in the interests of amenity. The Order will protect only those trees standing at the time it was made.
- **Woodland** - A Woodland TPO protects all trees within the defined area, including natural regeneration - seedlings and saplings i.e. trees less than 3.5m in height are not excluded. The woodland category's purpose is to safeguard a woodland as a whole. So it follows that, while some trees may lack individual merit, all trees within a woodland that merits protection are protected and made subject to the same provisions and exemptions. In addition, trees and saplings which grow naturally or are planted within the woodland area after the Order is made are also protected by the Order.

How to...

Find a tree:

- Use the search box to locate a specific protected tree, e.g. 1716/2020 or find an address.

View a Tree Preservation Order document (PDF):

- After locating the protected tree you wish to explore, left-click it on the map to see more details.
- To view a Tree Preservation Order document (PDF) left-click "View" next to TPO Document within the pop-up.
- This will open our TPO document storage system in a new tab
