COMMENTS:

The area has benefited greatly by having a much needed large open air pool during the summer months and there is a lack of this in the area All people from the very young to elderly, fit and disabled have been able to use the pool to help with health and well being there are sufficient spa facilities in the area to suit all and another is not needed

With regard to parking, the gym needs more parking at times not less There is plenty of room in the current building for what is required and it contains a perfectly suitable spin/cycle area

The pool is also used by local people to train and has always catered for children perfectly well since it was built. There are several other places in the area that have small pools for children
