COMMENTS:

I am writing to express my full support for the proposed construction of the mosque in our community. This project represents not just a place of worship but a space for community cohesion, social support, and positive engagement for people of all backgrounds.

It is disheartening to see that some individuals, driven by prejudice, are attempting to derail this development by hiding behind superficial excuses such as traffic concerns or minor logistical issues. We must be honest these arguments are often used as a veil for intolerance. Our community deserves better than to let bigotry dictate progress.

The mosque will serve as a valuable community hub, just as churches, synagogues, and temples have for others. Traffic concerns, if genuine, can be managed responsibly through appropriate planning measures, as they are for countless other developments across the city. To single out this project for such objections is unfair and reveals a troubling double standard.

I urge the council to see through these baseless objections and to approve this project in the interest of fairness, inclusivity, and the future harmony of our community.
