COMMENTS:

I am writing to formally object to the proposed development of 450 additional homes in our area.

The local infrastructure is already under significant strain. Roads are congested, particularly during peak hours, and adding hundreds more vehicles will only exacerbate this issue. Access to essential services is also becoming increasingly difficult residents are struggling to secure timely appointments with GPs and dentists, and local schools are oversubscribed with no indication of future expansion plans.

Beyond the pressure on infrastructure and public services, there is a serious environmental concern. The proposed development threatens the remaining green spaces and countryside that are vital not only for local wildlife but also for the well-being of the community. Once these natural areas are lost, they are gone for good.

In summary, this development would put an unsustainable burden on infrastructure and services, diminish quality of life for current residents, and cause irreversible environmental damage. I urge the council to reconsider this proposal and to prioritise sustainable planning that takes both community needs and environmental protection seriously.
