Dear Sir

Re: **Proposed Installation of 3 Dish Antennae, Relocation of 2 Dish Antennae and Ancillary Development on Roof of Car Park, Tesco Stores Ltd, Denmark Street, Wokingham – TL/2000/2575**

With reference to my telephone conversation this afternoon with Emy Curtain, I am writing to advise you that my Company wishes to withdraw the GPDO Application dated 25th October 2000. This is due to the fact that we have been advised by your Council`s Property Services Department that it is not possible to agree to a variation of the existing Lease to One 2 One until the matter relating to the occupation of the former Tesco store has been resolved, therefore the matter is on hold for the time being. It is therefore possible that One 2 One`s proposals will have to be altered and we will advise you in due course how the matter is to proceed.

Yours faithfully

P O Box 157
Shute End
WOKINGHAM RG40 1WR

Dear Ms Circuit

Ref: TL/2000/2575

With reference to the above planning application for the erection of telephone masts on the roof of the Elms Road car park, we would point out that the new structures although fenced in will be a possible target for vandals.

We live in one of the flats attached to the multi-storey car park and on numerous occasions have had to go up to the roof to remove young people who seem to have a fascination for jumping down on to the flat roof above our flat. It would seem that anything that offers a challenge or somewhere new to sit or cycle/skateboard etc, cannot be resisted.

We understand that the masts will be VHF and are probably harmless healthwide – BUT anyone approaching very near would be seriously injured. It is in our opinion more sensible to erect the mast on a roof that is completely unapproachable by the general public and the youth of the town.

We trust that you will take the above comments into consideration when making a decision as to where these masts should be sited., particularly as the Council are now the landlords of the six flats where we llive.

Yours sincerely

Joy Butler Peter Butler

Your Ref:

Date: 30/10/2000

TESCO, DENMARK STREET, WOKINGHAM, RG11 2LD. INSTALLATION OF ANTENNAE AND ANCILLARY EQUIPMENT. TL/2000/2575

Having considered the Environmental Health implications of the above planning application, I have no objections to planning consent but have the following comments to make in relation to this proposal.

There have been questions raised as to the possibility of adverse health effects from electromagnetic radiation from telecommunication base stations and their positioning in relation to residential development and in particular schools.

The National Radiological Protection Board (NRPB) was established by the Radiological Protection Act 1970 and is responsible for conducting research and providing advice and services for protection against ionising and non-ionising radiation in the U.K. They are continually reviewing the vast body of world-wide research on the subject.

The NRPBs' current advice is that there is no proven human health risk from these installations. This position is confirmed by the Chartered Institute of Environmental Health and pressure groups such as Powerwatch network. There are however countries and areas of the world where precautionary measures have been adopted, e.g. New Zealand Ministry of Education has issued a policy statement preventing cellular phone antennas from being sited at state schools in the future.

Further research is currently being undertaken into possible health implications although to date no definitive statement can be made.

The NRPB have set up an Advisory Group to look into this matter. This Group has concluded, in reference to buffer zones for sensitive developments, that there is neither a clear basis from which to derive a meaningful assessment of risk, nor is there any indication of how putative risk might vary with exposure. Thus there is no scientific justification for seeking to reduce exposure in these situations and that a decision to do so must be based on social and economic rather than scientific grounds.

continued.....

The Chartered Institute of Environmental Health's current policy is as follows:

"The CIEH with regard to overhead and buried high voltage power lines, electricity sub-stations, wind generators, microwave and radio transmitters mobile phone base stations and other similar installations emitting electro magnetic radiation (EMR) in close proximity to dwellings considers:

(a) That the effect on human health based on scientific evidence is insignificant and not proven.

(b) That there is no convincing national or international scientific research linking Electromagnetic Radiation and deterioration in human health.

(c) That a precautionary approach to restricting building or access near such installations (apart from physical safety barriers) cannot be sustained on health grounds alone and if adopted must be based on access, amenity and public acceptability considerations.

(d) That Local Authorities should adopt a policy on how to address questions from the public on Electromagnetic radiation from such sources."

Please contact me if you require further information.
