COMMENTS:

I object the building of more houses in a rural area already over populated and over polluted. The infrastructure is not sufficient for the current population.

In quiet times access to the A33 is difficult, in busy times 15 minutes should be added to journey times.

I suppose it will provide additional revenue as the Police speed watch team have taken up residency in the village. It is a known fact that a high number of drivers fail to adhere to speed limits in this rural area.

Wildlife will be severely impacted with the loss of an important field. The connection to woodland from the Wellington country park is via this field. I fear deer will still want to access the woods using the roads instead. Dead deer on the roadside is not to be promoted. Additionally reasons for objection are;

Flood risk-already a huge local issue.

Schools already filled to capacity.

Doctors surgery already filled to capacity.

Bus service-very little service.

Additional housing in a tight rural area is not clever.
